**Day Job:** Taking care of people with breast problems and creating teaching material for patients, their families and professional staff.

**Night Job:** Trauma and general surgery emergencies

**Interests or Hobbies:** Kayaking in the St. Lawrence with his wife

**Dr. David Fleiszer is riding for:**

## THE CEDARS BREAST CLINIC

His patients and their families so we can provide the best care possible

*Dr. David Fleiszer*

The **Cedars Breast Clinic of the MUHC** brings together - in one location - top medical teams from two prestigious institutions: the Royal Victoria Hospital and the Montreal General Hospital. This is a significant women's health care milestone and a proud reflection of both the visionary leadership of the Cedars Cancer Institute and the spirit of its committed volunteers and loyal donors.

The Cedars Breast Clinic of the MUHC opens a magnificent window of hope for women facing the prospect of breast disease. Our goal is to provide women of all ages and walks of life with fully-integrated, "one stop" health care and support during one of the most difficult times of their lives.

In fact, whenever possible, our aim is to provide examination, testing and diagnosis all on the same day or evening, or on the weekend. It is important to note that the Cedars Breast Clinic will not only provide physical support for women. In collaboration with **Cedars CanSupport** and the psycho-social services of the MUHC, the Clinic also provides emotional support for women facing breast cancer including their families.

In short, with your support through the Ride with Lance, to benefit the Cedars Cancer Institute and the MUHC's Cancer Care Mission, the Cedars Breast Clinic will remain an innovative prevention and treatment centre in a care class all by itself!

*Together, the Best Care for Life*
